3. Prescriptive Strategy & Action Plan

Optimize Enterprise Tier Pricing & Discount Thresholds (High Urgency | Impact: +$42,500 / quarter)
• ML anomaly analysis identified 14 enterprise orders with unapproved discount rates exceeding 25%. Restricting manual discount caps to 15% recovers lost margin.

Reallocate Inventory for Mid-Month Surge in Enterprise Software (Medium Urgency | Impact: +$28,000 / month)
• Time-series forecasting models project a 22% spike in demand for Enterprise Software licenses between the 12th and 20th of next month.

Investigate High-Risk Revenue Anomaly in APAC Region (High Urgency | Impact: $18,500 Risk Avoidance)
• Isolated 3 transaction spikes with negative margin in APAC. Data suggests potential misconfigured currency conversion rate during billing.

Capitalize on Cloud Analytics Subscription Momentum (Medium Urgency | Impact: +$34,000 / quarter)
• Cloud Analytics product line shows consistent positive forecast variance over 3 consecutive months with zero churn.
